

Hospital emergency stretcher h919_37

Hydraulic emergency stretcher with mattress, steel structure and side rails. Dimensions: approx. L 204 x W 73.8 x H 64 to 112.5 cm.

The **hospital emergency stretcher H919_37** is designed to ensure **safety, stability and comfort** during patient transport and care in healthcare facilities. Its **steel structure with epoxy finish** makes it extremely resistant, easy to sanitize and suitable for intensive use in hospitals, emergency rooms and ambulances.

The **1900 x 600 mm two-section bed platform** allows for optimal patient management, while the **hydraulic height adjustment system (from 640 to 1125 mm)** facilitates operations for healthcare workers. Thanks to the **150 mm wheels**, one of which is directional, it is possible to move the stretcher with ease, ensuring maneuverability even in the tightest spaces.

The **H919_37** comes with **essential accessories already included**, such as the **mattress, IV pole, clothes holder** and **oxygen cylinder holder**, offering a complete and ready-to-use solution.

Reliability and safety for patient transport! The **emergency stretcher H919_37** is the perfect choice for hospitals and emergency rooms. **Buy now** or **request a personalized quote**.
