

Hospital gas cylinder trolley h55_48

Hospital gas cylinder transport trolley Ø180 from 10-14 L, 2 non-marking 150 mm wheels, restraint strap, ergonomic non-toxic gray rubber handle.

The hospital gas cylinder transport trolley is an indispensable aid for healthcare facilities such as hospitals and private clinics, as well as for home settings where frequent use of oxygen cylinders represents a continuous therapeutic need. The product facilitates the safe and controlled movement of the cylinder within medical or residential environments, reducing risks associated with manual transport and ensuring stability during movement.

The trolley is **specifically sized for Ø180 10/14 L cylinders** and combines operational practicality with structural reliability. The design takes into account both safety standards and the ergonomic needs of the operator.

Technical features
