

Hospital laundry trolley h13_231

Closed medical trolley in painted steel for simultaneous management of clean and dirty laundry. Dimensions 133x65x120 cm, Made in Italy.

The **closed laundry management trolley** is a professional solution designed to optimize workflows within hospital structures, clinics, and nursing homes. The structure allows for the integration of clean laundry transport and dirty laundry collection into a single module, ensuring high standards of hygiene and order in the wards. Made with a **sturdy painted steel structure**, the trolley protects the load from external agents and ensures a long operational life even in high-frequency use contexts.

Technical features

- **Structure:** Painted steel with a closed configuration for maximum protection.
- **Movement system:** 4 swivel non-marking wheels Ø 125 mm, 2 of which are equipped with a foot brake.
- **Waste/dirt management:** 2 rectangular supports with a rubber ring for stable bag fixing.
- **Covers:** 2 lids made of high-resistance non-deformable plastic material.
- **Internal organization:** 3 total shelves, 2 of which are adjustable on a rack system to adapt to different load volumes.
- **Protections:** Non-marking gray rubber corner bumpers to preserve walls and furniture.
- **Compatibility:** Designed for 70-liter waste/laundry bags.
- **Dimensions:** W 133 x D 65 x H 120 cm.
- **Production:** Made in Italy, compliant with current regulations in the healthcare sector.
