

Hospital laundry trolley h13_236

Hospital trolley in antimicrobial steel (82x64x128 cm) for clean linen. Lightweight structure with doors, drawer and non-marking wheels.

The professional trolley for distributing clean linen is designed to optimize logistical flows and hygiene protocols within **clinics, hospitals and residential facilities**. Made of **antimicrobial epoxy powder-coated steel**, it combines the structural robustness necessary for intensive use with superior maneuverability, while ensuring an environment hostile to bacterial proliferation.

The internal configuration provides a rational organization of spaces, protected by two front doors with key lock, while the upper part offers a work surface in impact and chemical-resistant **plastic technopolymer**. The handling system is entrusted to silent wheels and an integrated ergonomic handle, facilitating transport even at full load.

Technical features

- **Structure:** Painted steel with antimicrobial treatment.
- **Upper surface:** High-resistance plastic technopolymer top.
- **Storage compartment:** 2 doors with 2 adjustable internal shelves.
- **Additional storage:** 1 integrated upper drawer.
- **Security:** Centralized key locking system.
- **Dimensions:** L 82 x D 64 x H 128 cm.
- **Mobility system:** 4 non-marking swivel wheels Ø 125 mm, 2 of which are equipped with parking brakes.
- **Production:** Made in Italy.
