

Hospital laundry trolley with 2 doors h640_13

Anodized aluminum laundry trolley with 2 doors.

This **laundry cupboard trolley** made of **anodized aluminum** is equipped with a removable shelf. The two **hinged doors** with central locking can be **rotated by 270°**, are equipped with central locking, and have a magnet on both sides to keep both doors open during transport. A **solid push handle** is fixed on each narrow side for **easy handling**. **Laundry trolley** particularly suitable for hospitals, nursing homes, and clinics, characterized by its **maximum stability**, robustness, and high-quality workmanship. The door hinges are maintenance-free and silent thanks to a special Teflon coating. The frame of the aluminum cupboard trolley consists of two fixed and two swivel wheels (diameter: 200 mm) and is interchangeably screwed to a torsion frame. All rollers have precision ball bearings. The **swivel wheels** are equipped with brakes. There are two all-round impact protection devices at the top and bottom for protection. Equipped with DIN A4 and DIN A7 sign frames for accompanying cards, the intermediate shelves are removable.

Technical Features:
