

Hospital medical screen h930_01

Medical screen in washable cotton. Robust structure, 1 section, 75x33x168 cm. Patient privacy in hospitals and emergency rooms.

The medical screen is an essential tool in healthcare environments to **guarantee patient privacy and dignity** during medical examinations, diagnostic, and therapeutic procedures. Used in hospitals, emergency rooms, clinics, and wards, it allows for the creation of delimited and private spaces while maintaining the operational practicality of medical and nursing staff.

The **robust structure** ensures stability even in high-traffic environments, while the **cotton covering** combines hygiene, durability, and ease of maintenance.

Technical features

- Cotton fabric covering
- Washable for hygiene and sanitization
- 1-section configuration
- Length: 75 cm
- Depth: 33 cm
- Height: 168 cm
