

Hospital screen in aluminum h582_42

Hospital screen in anodized aluminum, 3 sections with washable self-extinguishing curtains, Ø 50 mm castors with brake, W.160xh.170 cm.

The hospital screen is a solution designed to ensure **patient privacy during visits and medical procedures**. Built in **anodized aluminum**, it offers a lightweight yet robust structure, ideal for high-frequency healthcare environments. The three-section composition allows for flexible positioning and rapid adaptation to available spaces in wards, clinics, and patient rooms.

The **washable self-extinguishing plastic curtains** ensure compliance with hospital hygiene and fire safety requirements. The **Ø 50 mm castors**, with brakes on the central sections, allow for easy movement and stability when positioned.

Technical features
