

Hospital stretcher with fixed structure h559_07

Ward stretcher with fixed structure, easily maneuverable. Dimensions: L198 x D76 x H75 cm

Patient transport stretcher ideal for hospitals, clinics, nursing homes. With **fixed structure, not height-adjustable**, equipped with **push handles** at both ends and **4 corner bumpers**. Complete with **universal cylinder holder, collapsible side rails** and mesh with **reclining headrest** via rack operated by a handle. The base of the structure features **4 wheels diam 200 mm, two of which with braking system**. The stretcher is characterized by a **very solid and robust structure**, but at the same time **easily maneuverable and easy to assemble**. In addition, the simple design also makes it **easy to wash and disinfect**. Painting is done with **epoxy powders in gray and white**. The **mattress is not included**, it can be purchased among the options.
