Hospital tilting bed with integrated scales h634_61

Motorized hospital bed with tilting function, integrated weighing system, and passive mobilization for bedridden patients. Steel frame, HPL bed platform, touch screen controls.

The Tilt verticalizing hospital bed is a complete medical device intended for medium-to-large hospital facilities, designed to facilitate **early mobilization of bedridden patients** without resorting to transfers on external aids. Passive mobilization cycles significantly reduce the risks associated with manual patient movements.

The structure combines a **reinforced steel frame protected by thermosetting epoxy paints** with advanced technological components. The bed platform is articulated in four sections with triple articulation, made of washable HPL to ensure hygiene and durability. Horizontal and vertical movement is achieved through low-voltage electric actuators (24V DC) with an integrated anti-crushing device.

Technical features

- **Backrest section:** motorized, range 0-70°
- **Femoral section:** motorized, range 0-25°
- **Leg section:** motorized synchronous to femoral movement
- **Tilting/Verticalization:** range 0-76° via dedicated electric actuator
- **Variable height:** motorized columns with +300 mm excursion, bed platform at 550 mm
- **Trendelenburg/Reverse Trendelenburg:** motorized, range -17°/+17°
- **Cardiac position:** preset available
- **Telescopic columns:** rectangular section, two in the foot area, one in the head area
- **Wheels:** twin, swivel, non-marking
- **Side rails:** retractable split rails
- **Containment straps:** integrated
- **Headboard:** technopolymer
- **Footboard:** HPL with lined interior, bilateral footboard
- **Panels:** HPL
- **CPR lever:** bilateral
- **Inclinometer:** bilateral
- **Weighing system:** integrated with weight indicator
- **Control panel:** touch screen, positioned on the back of the backrest
- **Monitoring functions:** weight loss alarms, patient exit alarms, weight loss countdown, automatic and manual tare
- **Patient data:** integrated records
- **Maintenance:** initial self-diagnosis, scheduled maintenance alert
- **Hand control:** 10 buttons
- **Emergency battery:** integrated

- **Accessories:** head and foot cable winders
- **Dimensions:** L. 2209 × W. 1061 × H. 1489 mm
