

Hospital trolley for electromedical devices h930_63

Medical trolley in steel and aluminum, with adjustable trays. Dimensions: W 53 x D 41 x H 91 cm.

The **H930_63 hospital trolley for electromedical devices** is designed for the **safe and rapid transport** of medical devices and instruments over short distances, and is particularly suitable for use in **hospitals, operating rooms, outpatient clinics and specialist centers**. Thanks to its compact structure and modular design, this trolley represents a **practical and flexible solution** for those who need a resistant, manageable and highly customizable mobile station.

Built with high-quality materials, the trolley is made of **powder-coated steel**, combined with **aluminum profiles** that ensure lightness and durability over time. The product is available with **high profile** and **low side profile**. Upon request, standard profiles equal on both sides can also be provided. Different profiles are suitable for positioning **IV drips or cable supports**. The **steel trays** offer stable support for electronic devices, ensuring **safety even for delicate equipment** such as monitors, defibrillators, electrocardiographs or infusion pumps.

A fundamental element is the possibility of **freely adjusting the height of the shelf and drawers** along the vertical aluminum profiles, allowing for a configuration that is totally adaptable to the operational needs of healthcare personnel. Each tray has a maximum load capacity of **10 kg**, with dimensions of **43.6 x 31.1 cm**, ideal for supporting compact instrumentation.

The trolley is mounted on **4 swivel wheels with brake**, which guarantee safe and stable movement even on slippery surfaces or in confined spaces such as hospital wards.

Optimize the mobility of your medical equipment with the **H930_63 trolley**. Purchase it now or request a personalized quote for hospital supplies!

Technical features:

- **Structure:** powder-coated steel and aluminum profiles
- **Equipment:** high profile and low side profile
- **Trays:** steel
- **Tray dimensions:** 43.6 x 31.1 cm
- **Shelf and drawer height:** shelf and drawers can be positioned along the profile
- **Permissible load per tray:** 10 kg
- **Wheels:** 4 with brake
- **Dimensions:** W 53 x D 41 x H 91 cm
- **Total weight:** 24 kg

User benefits:

- **Shelves and drawers:** adjustable for maximum flexibility of use.
- **Transport:** easy and safe in high-intensity healthcare environments.

- **Surface:** resistant and easy to sanitize.
- **Wheels:** with brake for total stability during use.
- **Ideal:** for compact medical equipment in operating rooms or outpatient clinics.

FAQ:

1. What are the dimensions of the trolley?

The dimensions of the trolley are W 53 x D 41 x H 91 cm.

2. Is it possible to change the position of the shelf and drawer?

Yes, both are adjustable in height along the aluminum profiles.

3. Is the trolley suitable for surgical environments?

Yes, it is designed to be used in operating rooms, thanks to its hygienic and stable structure.

4. What is the load capacity of each tray?

Each tray can support up to 10 kg.

5. What type of devices can it support?

The trolley is suitable for compact electromedical devices, such as ECGs, patient monitors, pumps and portable devices.

Mini buying guide:

To correctly choose an electromedical trolley, it is essential to consider **load capacity**, **modularity** and **material resistance**. Equipped with **high profile** and **low side profile**.

The H930_63 model is perfect for those who need a flexible solution: thanks to the **height-adjustable shelves and drawers**, it is possible to adapt the trolley configuration to different types of instruments.

The **steel and aluminum structure** guarantees robustness and hygiene, while the **wheels with brake** offer stability during delicate medical operations.

It is the ideal choice for healthcare facilities that require efficiency, practicality and safety.
