

## Hospital trolley with 7 stainless steel drawers h13\_307

Stainless steel hospital trolley with 7 drawers and shelf compartment for efficient management. Dimensions: W. 67x D. 63x h.104 cm.

Designed for healthcare environments, the **stainless steel hospital trolley with 7 drawers** is a complete and durable solution for managing medical materials and instruments. The **monobloc structure** offers high resistance, ideal for intensive use in hospitals and clinics. The upper part is equipped with a **large support surface** in technopolymer, with three containment sides to ensure instrument stability during transport. The ergonomic handle allows for **smooth and safe movement** within the ward.

The 7 front drawers, made of steel with epoxy powder-coated panels, slide on **silent and end-of-stroke guides**, ensuring ease of use and reducing the risk of accidental fallout. Each drawer is **removable** for easy cleaning, meeting the hygiene requirements of healthcare environments. The **centralized lock with key** protects the content, offering secure management of medicines and instruments.

The antistatic wheels with brakes and integrated bumpers protect the trolley and environments from damage, making every movement safe. The trolley is **Made in Italy**, a guarantee of high quality and compliance with health regulations.

Optimize the management of your hospital instruments: **buy now** the professional trolley!
