

Hospital twin newborn crib h934_05

2-place pediatric crib with tilt adjustment and height adjustment via foot pedal. Dimensions: W. 90 x D. 70 x h. 110 cm.

The **twin newborn crib** represents an innovative and practical solution for the needs of mothers and their little ones in the hospital. Designed to offer optimal comfort, it allows for immediate and safe interaction between mother and newborns. The **tilt adjustment** is guaranteed by a **gas compression spring**, which allows the position of the beds to be adapted easily and smoothly. Furthermore, **the height of the crib** can be **adjusted from approximately 64 cm to 82 cm** via a practical foot pedal, facilitating access and positioning of the newborn. The **twin-wheel casters**, equipped with **locking brakes**, ensure optimal stability and effortless mobility. The **double foam mattress** offers comfortable support, while the **washable and water-resistant cover** ensures easy and hygienic maintenance. This crib is designed to offer serenity and practicality to parents and healthcare workers, making every moment spent together more special.
