

Hospital ward bed manually adjustable h937_22

Hospital bed with 3 joints and 4 sections, adjustable by means of two independent cranks. Dimensions: W. 2060 x D. 910 x h. bed base 470 mm.

This **hospital bed** is designed to ensure comfort and functionality in healthcare facilities such as hospitals, clinics, and nursing homes. Equipped with **three joints and four adjustable sections**, the bed allows independent control of positions via **two folding and retractable cranks**, which operate screw pushers with limit switches for the **headrest** and **legs**, while the **foot section** adjusts automatically in sync with the legs. The **pelvic section is fixed**. The **sturdy structure** is built from **rectangular section steel profiles**, with **rounded edges** and a **rigid steel mesh welded to the frame**, ensuring stability and safety. **Removable headboard/footboard** made of **round section painted steel Ø 30x1.5 mm**, equipped with **removable melamine-faced panels**, in **white**, for easy maintenance. The **epoxy powder finish** baked at 200°C ensures a resistant and durable coating, maintaining a hygienic and clean appearance over time. The bed is also equipped with 2 supports for the patient lifter pole and the IV pole, making it a versatile and complete option for healthcare.

Technical features:

- Bed base: 890x1990
- Bed base height: 470 mm
- Headboard - footboard height: 460 mm
- Overall dimensions: 2060x910 mm
- Headrest section: 750X785 mm
- Pelvic section: 890X305 mm
- Leg section: 785X410 mm
- Foot section: 785X400 mm
- Safe working load: 170 kg
- Max patient weight: 135 kg
- Bed weight: 36 kg
- Bed gross weight: 39 kg
- Bed with 3 joints and 4 sections adjustable via two independent cranks
- Peripheral load-bearing structure in rectangular section steel profiles
- Frame of the moving sections in rectangular section steel with rounded edges
- Rigid steel rod mesh with 100x50 mm rectangular mesh, welded to the mobile frame
- Equipped with supports for patient lifter pole and IV pole
