

## Hot-dip galvanized spill pallet for liquids h874\_40

Spill pallet for 4 drums of 200 lt, made of hot-dip galvanized steel. Collection capacity 410 lt. Dimensions: 1200 x 1200 x h. 410 mm.

The **hot-dip galvanized spill pallet for liquids h874\_40** is a robust and efficient solution for the storage and management of 200-liter drums in industrial environments. With a **structure** made entirely of **3 mm steel sheet** and a **hot-dip galvanized** finish, this tray offers superior protection against corrosion and atmospheric agents, ensuring long-term durability even under intensive use conditions.

The **base**, composed of **hot-dip galvanized profiles**, ensures **exceptional strength** with a **load capacity of up to 1200 kg**, making it ideal for supporting up to **4 drums of 200 liters**. The **lifting height of 100 mm** allows for easy handling via pallet truck or forklift, while the **stackable design** optimizes space during transport or storage when the tray is not in use.

With a **collection volume of 410 liters**, this pallet is perfect for managing accidental liquid leaks, helping to keep work environments safe and clean. The high capacity makes it ideal for industries requiring rigorous management of oils, solvents, or other liquid substances.

**The product sold is a single pallet (the lower one in the image). The photo shows two pallets stacked to highlight the stackability feature.**

Invest in the safety and efficiency of your industrial environment with the **h874\_40 tray**. Robust, resistant, and versatile, it is the ideal choice for professional liquid management. **Order now!**

### Technical specifications:

- **Dimensions:** 1200 x 1200 x h. 410 mm
- **Collection capacity:** 410 lt
- **Load capacity:** 1200 kg
- **Structure material:** 3 mm hot-dip galvanized steel sheet
- **Base:** hot-dip galvanized profiles
- **Lifting height:** 100 mm
- **Maximum capacity:** 4 drums of 200 lt
- **Weight:** 98 kg
- **Stackable:** yes

### User benefits:

- **Corrosion resistance:** Thanks to hot-dip galvanization, the tray is ideal for harsh environments and adverse weather conditions.
- **High capacity:** With 410 lt of collection and support for 4 drums, it is a practical and spacious solution.
- **Easy handling:** The lifting height and pallet truck-compatible design simplify transport.
- **Space-saving design:** The ability to stack the tray optimizes space usage.
- **Guaranteed safety:** Ideal for preventing accidental spills and maintaining a clean and safe work environment.

### FAQ:

1. **What materials are used for construction?**

The tray is made of 3 mm steel sheet, fully hot-dip galvanized to ensure strength and longevity.

2. **Can I use this tray for corrosive liquids?**

Yes, thanks to the hot-dip galvanization treatment, the tray is highly resistant to aggressive and corrosive substances.

3. **How is the tray moved?**

The tray is equipped with a lifting height of 100 mm which allows handling via pallet truck or forklift.

4. **How many drums can it hold?**

It can hold up to 4 drums of 200 liters each, positioned vertically.

5. **Is the tray stackable?**

Yes, the stackable design allows for optimizing space during transport or empty storage.

**Buying guide:**

Choosing a **hot-dip galvanized liquid containment tray** like the **h874\_40** model means investing in a durable and reliable solution for the safe management of liquids in industrial settings. Ideal for companies needing protection against liquid leaks, the tray offers a collection capacity of **410 liters**, perfect for holding up to **4 drums of 200 liters**. The **hot-dip galvanized steel** structure ensures exceptional resistance against corrosion and daily wear, making it suitable for demanding industrial contexts.

Before purchasing, ensure that the available space is compatible with the tray dimensions and verify the need for handling with pallet trucks or forklifts. Thanks to the **stackable design**, this tray also allows for space optimization during transport or empty storage.

Invest in the **h874\_40** model to ensure safety, durability, and practicality in your industrial environment!
