

Hot water dispenser 10 lt h83344

10-liter stainless steel hot water dispenser, 2000W. Adjustable temperature 30-110°C, rapid heating and drip-free tap for catering.

The **h83344 hot water dispenser** is the ideal professional solution for managing large quantities of hot drinks during events, catering, or buffets. With a capacity of 10 liters, this appliance allows you to always have water available at the perfect temperature for tea, herbal teas, or instant coffee, reducing waiting times for guests. The **stainless steel** structure guarantees hygiene and durability, while the insulated side handles and the lid knob in heat-resistant plastic allow for safe handling without risk of burns. Thanks to the analog thermostat, it is possible to customize the heat according to specific needs, making this dispenser extremely versatile, also excellent for serving **gluhwein (mulled wine)**. The design is completed by an external level indicator that allows constant monitoring of the filling without having to lift the lid.
