

Hotel furniture safe h3397

Professional electronic safe with motorized opening and anthracite-colored steel structure. Compact and robust design (11 kg), ideal for every type of room. Dimensions: H 250 x D 270 x W 350 mm.

The **electronic safe with motorized closure** is the ideal solution to elevate the standard of security and comfort in modern accommodation facilities. Designed for hotels, resorts, B&Bs, and holiday villages, this model solves the operational problem of managing valuables, offering guests a secure and intuitive place to keep documents, jewelry, and electronic devices. Its solid structure, combined with an essential design in **anthracite color**, allows for discreet integration into any furnishing style.

The strength of this model is the **motorized opening**: upon entering the correct code, the system automatically unlocks the bolts, facilitating access to the compartment without the need for manual mechanical maneuvers. With a weight of 11 kg and balanced dimensions, the safe guarantees excellent passive resistance and great positioning flexibility, making the guests' stay serene and technologically advanced.
