

Hotel minibar 25 lt h3414

Built-in 25 lt minibar h3414, silent absorption system with LPC technology. Compact dimensions W42xD37.5xH43.5 cm and black panelable door.

The **Hotel minibar 25 lt h3414** is an extremely compact built-in unit, designed for accommodation facilities that need to optimize every square centimeter without sacrificing performance. This minibar solves the noise problem in hotel rooms thanks to a **next-generation absorption cooling system**, which guarantees absolute silence for the guests' rest. Energy efficiency is ensured by **LPC technology**: an advanced electronic system that, through a dedicated probe, optimizes the internal temperature while reducing consumption. The **panelable door**, supplied as standard in black but customizable on request, allows for perfect aesthetic integration with the room's furniture coordination, making the minibar a discreet and functional element.
