

Hotel room kettle h31_327

1.2-liter stainless steel electric kettle with VDE plug and 1350W power. Elegant and compact design, ideal for hotels, B&Bs and resorts.

The **professional electric kettle** in 1.2-liter stainless steel is the ideal solution for accommodation facilities wishing to offer a reliable and refined courtesy service. This model solves the problem of durability in high-turnover environments such as hotels and B&Bs, where plastic devices could deteriorate prematurely. Thanks to the **stainless steel structure**, the kettle not only guarantees a modern and clean aesthetic, but also facilitates daily sanitization operations carried out by housekeeping staff. The provision of the **VDE plug** ensures a safe electrical connection compliant with European standards, making it an indispensable complement for the contemporary hotel room.
