

## Hotel room safe h33\_137

Professional electronic safe in "Laptop" format with permanent memory and double security (Master code and key). Thermosetting grey finish. Dimensions: W 40.5 x D 41 x H 20 cm.

The **professional digital electronic safe** is the ideal security solution for hotel rooms, B&Bs and holiday homes, designed to offer robustness and ease of management. Characterized by an ample depth of 41 cm, this safe solves the operational problem of storing electronic devices, making it perfect for housing **laptops, tablets and documents** in total safety.

The electronic system is equipped with **permanent memory**, which allows for the retention of set codes even when the batteries are depleted, drastically reducing technical assistance interventions. For the hotelier, security is guaranteed by a dual unlocking system: a **changeable Master code** for digital management and an **emergency lock with a physical key** for manual mechanical opening. The structure is protected by a grey thermosetting powder coating, highly resistant to scratches and daily wear.

## Technical specifications

- **External dimensions:** W 405 x D 410 x H 200 mm
- **Internal dimensions:** W 400 x D 385 x H 190 mm
- **Lock:** Digital electronic with permanent memory
- **Interface:** Visual and acoustic signals during code entry
- **Management security:** Programmable Master code and emergency key included
- **Thickness:** Door 3 mm, walls 2 mm
- **Finish:** Thermosetting powder coating
