

Hotel room waste bin h742_59

Recycling bin in galvanized steel with 2 separate flows, double wall and lid to hide the bags. Dimensions: W 27.5 x D 20 x H 34 cm.

The **hotel room waste bin h742_59** is an essential accessory for combining practicality, aesthetics and sustainability in accommodation facilities. Made of **sturdy galvanized steel**, this bin is designed for recycling and includes **2 plastic inner containers** that allow waste to be separated into two distinct flows.

The **double-walled** design and **integrated lid** not only ensure discreet waste management, but also hide the garbage bags, maintaining a tidy and elegant appearance in the room. The **matte black** color adds a touch of modernity and fits any furnishing style.

Thanks to the **rubber protection at the base**, the bin is stable, does not slip and protects floors from scratches and marks. The **10-liter** capacity is ideal for daily use in hotel rooms, offices or small spaces.

The compact dimensions of **W 27.5 x D 20 x H 34 cm** make it perfect for small spaces, without compromising functionality and capacity. The galvanized steel material ensures long life and resistance to wear, ideal for intensive use in professional environments.

Offer your guests a clean and organized environment with the **hotel waste bin h742_59**! Elegant, resistant and practical, it is the ideal choice for hotel rooms. Order it now!

Technical features:

- **Type:** Recycling bin with double flow
- **Material:** Galvanized steel

User benefits:

- **Practicality:** Double flow for orderly recycling management.
- **Polished aesthetics:** The integrated lid hides the bags, ensuring a clean and tidy appearance.
- **Durability:** Built in galvanized steel for long life and resistance to wear.
- **Floor protection:** The non-slip rubber base protects surfaces from scratches and marks.
- **Compact design:** Perfect for small spaces without sacrificing functionality.
- **Sustainability:** Ideal for promoting waste separation in your spaces.

FAQ:

1. **Is this bin suitable for hotel rooms?**

Yes, the compact dimensions and elegant design make it perfect for hotel rooms or professional spaces.

2. **How does the double flow system work?**

It includes 2 plastic inner containers, allowing you to easily separate waste for organized recycling.

3. **Is the lid removable?**

Yes, the lid is designed to hide the bags, but it can be easily removed to empty the containers.

4. **Does the bin slip easily?**

No, thanks to the rubber protection at the base, the bin remains stable and does not damage the floors.

5. **Is it resistant to daily use?**

Yes, the galvanized steel material guarantees strength and durability even with frequent use.

Mini buying guide:

A recycling bin is an indispensable element for hotel rooms and professional spaces that wish to combine practicality and aesthetics. The **h742_59 waste bin** offers an elegant and functional solution, ideal for promoting sustainability and keeping the environment clean and organized.

The **double-walled** design and **integrated lid** ensure discretion, while the **double flow** system simplifies waste separation. The galvanized steel structure ensures strength and durability, while the matte black color fits any furnishing style.

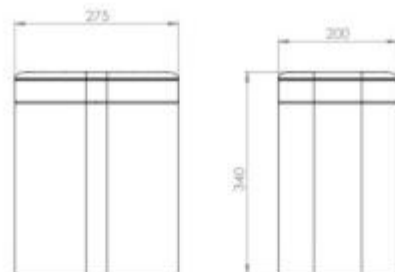

If you are looking for a compact, robust and aesthetically pleasing bin, the **h742_59** is the perfect choice for your rooms and common areas, offering your guests a superior quality experience.
