

Hotel safe h12949

Electronic safe for hotels and B&B in steel with internal LED light. Suitable for laptops up to 15". Dimensions: W 420 x D 370 x H 200 mm.

The **professional electronic safe** is the standard solution for security in hotels, bed & breakfasts and holiday homes that require a reliable and easy-to-use device. Made with a **sturdy steel structure**, this unit solves the operational problem of storing bulky digital devices, being perfectly compatible with **laptops and tablets up to 15 inches**. The functional design includes multilingual operating instructions posted directly on the door, drastically reducing assistance requests at the reception from guests.

The user experience is enhanced by the presence of an **internal LED light** that activates upon opening, allowing total visibility of the contents, and an equally illuminated external display for precise code entry. The security system integrates protection against tampering attempts: after 4 incorrect entries, the safe applies a **temporary 15-minute lockout**. Service continuity is guaranteed by a dual emergency system that allows immediate unlocking via **physical mechanical key or master code**.

Technical features

- **External dimensions:** W 420 x D 370 x H 200 mm
- **Material:** High-resistance steel
