

Hotel safe h31_301

Key-operated safe for hotel rooms. Dimensions: W 31 x D 20 x H 20 cm.

The **hotel safe h31_301** is a compact and reliable security module, designed to offer simple and effective protection within hotel rooms, B&Bs, and holiday homes. The structure is made with **laser-cut** technology, ensuring a precise finish and greater resistance to forced entry attempts. This model resolves the complexities of electronic management by relying on a **high-security mechanical cylinder lock**. The system is mastered to allow hierarchical control: the **blue key** is intended for the exclusive use of the guest, while the **red key** acts as a master key for emergency openings by the facility management.
