

Hotel safe h718_49

Professional armored safe with high thickness (Door 10 mm, Body 6 mm) with security key lock. Maximum passive protection (37 kg) in white finish. Dimensions: 38 x 30 x H 30 cm.

The **armored free-standing safe with key lock** (38 cm) represents the excellence of mechanical security for the hotel and professional sector. Designed for hotels, boutique B&B's, and high-profile offices, this unit definitively solves the vulnerability of electronic systems, focusing entirely on **extreme structural solidity**. The body is made of high-resistance steel with a thickness of 6 mm, while the monoblock door reaches **10 mm in thickness**, offering a real physical barrier against any manual break-in attempt.

The sober and elegant design in **white color** allows for harmonious integration into contemporary furnishings, while ensuring a generous internal capacity of 26 liters. The mechanical security key lock is the ideal choice for those who desire a **maintenance-free** product (no batteries to replace or codes to reset), offering constant reliability over time. The safe is designed for immovable anchoring to the wall or inside reinforced furniture, supported by an impressive structural weight of 37 kg that discourages removal.

Technical characteristics
