

Hotel safe with electronic display h128_45

Professional electronic safe with iAudit traceability system and laser-cut door. Suitable for 15" laptops, equipped with motorized opening and internal light. Dimensions: W 360 x D 410 x H 190 mm.

The **high-quality electronic safe** with a 24-liter capacity represents the state of the art in security for the hotel sector. Designed with an elegant design characterized by smooth surfaces and rounded edges, this unit solves the problem of protecting technological assets, being **perfectly compatible with 15-inch laptops**. The **laser-cut door** ensures millimeter precision which, combined with two robust 18 mm steel bolts, guarantees superior resistance against break-in attempts.

The true innovation lies in the **iAudit** recording system: a cutting-edge technology that documents every single operation performed on the safe (locking, unlocking, emergency openings). This protocol is fundamental for the hotel's legal protection and for insurance company requirements, allowing data to be verified even years later and printed using a standard PC printer. The user experience is made fluid by the **automatic motorized opening** and the internal LED light, which facilitates the visibility of the contents.

Technical features

- **External dimensions:** W 360 x D 410 x H 190 mm
- **Capacity:** 24 liters (Suitable for Laptops up to 15")
- **Mechanical security:** Laser-cut door with 18 mm steel bolts
- **Locking system:** Motorized with automatic opening
- **Security protocol:** iAudit system for recording and printing all operations
- **Lighting:** Automatic internal LED light
- **Emergency opening:** Master Key and Master code reserved for staff
- **Configuration:** Right-hand hinge
- **Certifications:** EAC, UKCA, CE
