Hotel safe with internal LED h128_48

Professional electronic safe "Laptop 15" with motorized spring-loaded opening and 30.4-liter capacity. Equipped with LED display, two 19 mm steel bolts and internal light. Dimensions: W 450 x D 410 x H 200 mm.

The **high-capacity electronic safe** of 30.4 liters is the ultimate solution for hotel facilities wishing to combine impenetrable security and maximum comfort for the guest. Thanks to its generous dimensions, this model solves the problem of storing bulky technological devices, allowing for easy housing of **laptops up to 15 inches**, SLR cameras and document bags.

The device employs industry-leading technology to ensure total protection: the **motorized locking system with spring-loaded opening** ensures quick and fluid access, while the mechanical block is entrusted to **two robust 19 mm steel bolts**. Perceived security is immediate thanks to the confirmation message "CLOSED" on the LED display, which reassures the user of the correct locking of the bolts. For management, operations are simplified by a double-level emergency system, which includes a six-digit Master code and a high-security Master key for mechanical openings.

Technical features

- **External dimensions:** W 450 x D 410 x H 200 mm
- **Capacity:** 30.4 liters (Laptop 15" format)
