

Hotel waste bin h957_43

Metal waste bin for hotel rooms, with 3 removable buckets. Capacity: 110 liters. Dimensions: Ø 46 x H 66.5 cm.

The **hotel waste recycling bin** (code H957_43) is designed to offer an elegant, safe, and functional solution for **indoor waste separation**, such as in hotel rooms, offices, common areas, or conference rooms. With a **circular metal structure** and **3 removable buckets** of different colors (yellow, blue, green), it allows for easy waste separation, simplifying collection operations.

Made of **white cold-rolled sheet metal** (quality DC01 – EN10130), the bin is finished with a **fire-retardant polyester resin powder coating**, complying with **A2-s1, d0 (EN13501-1)** and **M1 (UNE 23727)** standards. This makes it suitable even in environments where high **fire safety** standards are required.

The base is enriched by a **black PVC decorative element with a metal insert**, which gives a refined and modern touch, perfectly integrable into high-end furnishing contexts. Thanks to its **compact shape (diameter 46 cm, height 66.5 cm)** and **total capacity of 110 liters**, this waste bin combines **design and functionality** in a limited space.

Each internal bucket is individually removable to facilitate **emptying and maintenance**, improving staff efficiency and keeping the environment tidy. The net weight of **13.6 kg** ensures stability even in case of intensive use.

Make your facility more sustainable and tidy with the **H957_43 waste bin**. Contact us now to receive a tailored offer for bulk supplies.

Technical features:

- **Frame material:** cold-rolled sheet metal (DC01 – EN10130)
- **Frame finish:** powder coating with fire-retardant polyester resin
- **Fire reaction class:** A2-s1, d0 (EN13501-1) – M1 (UNE 23727)
- **Polymerization:** 200°C for 20 minutes
- **Paint thickness:** 60 microns
- **Base:** PVC with decorative metal insert
- **Number of internal buckets:** 3 removable (colors: yellow, blue, green)
- **Frame color:** black
- **Total capacity:** 110 liters

- **Net weight:** 13.6 kg
- **Dimensions:** Ø 46 cm x H 66.5 cm
- **Use:** hotel indoor environments, offices, common areas

User benefits:

- **Management:** of waste separation in an orderly and hygienic way.
- **Design:** modern and compact, suitable for rooms and common spaces.
- **Materials:** certified fire-retardant for greater safety.
- **Ease:** of emptying thanks to the removable internal buckets.
- **Resistant:** to impacts and abrasions, ideal for intensive use.

FAQ:

1. **Is it suitable for hotel rooms?**
Yes, thanks to its elegant and compact design, it fits perfectly even in limited spaces.
2. **Are the internal containers individually removable?**
Yes, each of the three buckets is removable for easier waste management.
3. **Does it comply with fire safety regulations?**
Yes, it is certified A2-s1, d0 and M1 for fire reaction.
4. **What capacity does the waste bin have?**
The total capacity is 110 liters, distributed across the three internal compartments.
5. **Is assembly required?**
No, it is supplied ready to use.

Mini buying guide:

Choosing a **waste bin for professional environments** means focusing on **safety, resistance, and practicality of use**.

The H957_43 model offers **three separate compartments** to facilitate waste separation, ideal for environmentally conscious accommodation facilities.

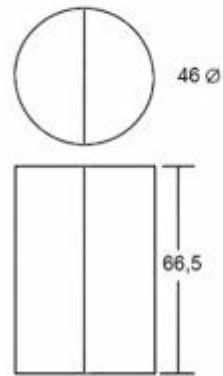

The **fire-retardant structure**, **compact design**, and **decorative base** make it a product suitable not only for functionality but also for aesthetics. It is essential to choose robust bins, with certified materials and easy to clean, to ensure hygiene and durability over time.
