

Impact protection h439_20

U-shaped impact protection in painted steel, TÜV certified, dimensions W 245 x D 200 x h 400 mm, ideal for indoor areas.

The **h439_20 industrial bumper** is a professional impact protection, ideal for **securing production areas, warehouses, and plants**. With its **U-shape** and **5 mm thick powder-coated steel** structure, this bumper is designed to **protect columns** from accidental impacts from forklifts or trolleys.

In **yellow color with black warning bands**, it guarantees **high visibility** and contributes to visual safety in work areas. TÜV certified **according to the DGUV 108-007 standard**, it complies with the standards required for the protection of structural elements in industrial environments.

It is supplied **pre-assembled** and is fixed by **bolting** (fixing material not included). It is suitable for **installations on paved surfaces**, thanks to the **W. 55 x D. 200 x 5 mm base plate**, which ensures its stability.

With compact dimensions of **W 245 x D 200 x h 400 mm**, it is perfect even in tight spaces, while always maintaining a high level of protection.

Buy your h439_20 U-shaped industrial bumper now! Protect your production areas with a certified and resistant device. Order today on Holity.com or **request a customized quote** for larger quantities or industrial supplies.

Technical features:

- **Material:** Powder-coated steel
- **Thickness:** 5 mm
- **Color:** Yellow with black warning bands
- **Shape:** U-shaped
- **Dimensions:** W 245 x D 205 x h 400 mm
- **Net weight:** 6.14 kg
- **Gross weight:** 8.67 kg
- **Mounting:** Floor-mounted, via bolting (4 holes, fixing not included)
- **Base plate:** 55 x 200 x 5 mm
- **Application:** Indoor use on paved ground
- **Certification:** TÜV (DGUV 108-007 / BGR 234)
- **Warranty:** 1 year

User benefits:

- **Certified safety:** compliant with the DGUV 108-007 standard.
- **High visibility:** yellow-black signaling to prevent impacts.
- **Robustness:** 5 mm steel for maximum protection.
- **Easy to install:** pre-assembled, ready for fixing.
- **Ideal for interiors:** perfect for warehouses and plants.

FAQ:

1. Where can the bumper be installed?

It is ideal for use on paved surfaces in indoor environments.

2. Is the fixing material included?

No, the bumper is supplied without the mounting kit.

3. Is it also suitable for outdoors?

No, this model is designed exclusively for indoor use.

4. How impact-resistant is it?

The 5 mm steel structure offers high resistance to impacts from trolleys and forklifts.

5. How can I know which model to choose for my plant?

We recommend evaluating the available space, the type of traffic present, and the required level of protection.

Mini buying guide:

Choosing the right impact protection depends on several factors that go beyond simple dimensions. A good bumper must offer **maximum mechanical resistance** to effectively absorb accidental impacts caused by forklifts, pallet trucks, or heavy machinery. It is essential to ensure that it is made of **thick steel**, as in the case of the h439_20 model with 5 mm thickness, ideal for high-intensity industrial environments.

The **TÜV certification** is an additional value because it ensures that the product complies with the DGUV 108-007 standard, specific for safety in the workplace. **Visibility** also plays an essential role: colors like **yellow with black bands** increase visual perception, reducing the risk of collisions.

Always evaluate the **ease of installation**: the h439_20 model is pre-assembled and prepared for floor fixing via bolting, without the need for complex interventions or special equipment.

Finally, consider the space available and the type of area to be protected. The **compact dimensions and U-shape** make it perfect for the protection of columns, shelving, electrical panels, or narrow passages, without compromising freedom of movement or access to operational areas.

Choosing the right model like the h439_20 means investing in **safety, durability, and regulatory compliance**, protecting your work environment from costly damage and ensuring the safety of operators.

U-shaped industrial bumper, warehouse impact protection, steel safety barrier, warehouse column protection, TÜV certified protection, protection for forklifts and trolleys
