

Inclusive educational game for playgrounds h575_72

Educational game of a pedagogical nature. Age 2-8 years.

Inclusive educational game for playgrounds that meets various **pedagogical needs**, as it plays a significant role in the development of a child's **basic skills**. In particular, the two cute faces emerging from the ground **stimulate curiosity** and encourage **approaching new experiences with a desire to learn**. Additionally, being an activity for two people, **it encourages socialization and inclusion**. The game consists **of communicating through the perforated sheet metal grates** that form the mouth of the face, in a sort of modern and **revisited wireless telephone**.

The structure is made with two HDPE shapes (10 mm thick) placed at a maximum distance of 16 m, connected to each other by a powder-coated steel transmission tube.

Technical characteristics:

- Dimensions: 1683x58xh.137 cm
- Safety area: 336x358 cm (x 2)
- Max fall height:

INFORMATION

- Width in millimeters 16830.000000
- Depth in millimeters 580.000000
- Height in millimeters 1370.000000
