- **What is the necessary impact-absorbing surface?**
An impact-absorbing surface of 53 sqm is recommended.
- **How many children can play at the same time?**
The structure can accommodate 3 or more children simultaneously.

Mini buying guide:

When purchasing an inclusive multi-play structure, it is important to ensure that it is designed to promote accessibility and

inclusion. This **Inclusive Multi-play Composition** is ideal for public playgrounds, schools, and play areas, thanks to its ability to accommodate **children with disabilities**. High-quality materials, such as aluminum and HDPE, are resistant and easy to maintain, guaranteeing long life. Furthermore, the **educational games** included stimulate children's cognitive and sensory skills, encouraging socialization and group play.

The design of the structure with **non-slip platforms** and low fall height makes play safe even for younger children.

Furthermore, it is useful to consider **maintenance**: materials like aluminum and HDPE are easy to clean and weather-resistant, reducing management costs over time. To ensure correct installation and fixing, the product is supplied with **fasteners, screws, nuts, washers etc. in galvanized steel and protected by polyethylene caps and nut covers**. Finally, choose this structure if you are looking for a versatile playground that promotes **safe and educational fun** for all children, regardless of their physical abilities.
