FAQ:

1. **Is the carousel also suitable for children without disabilities?**
Yes, the carousel can be used by children with and without disabilities, making it perfect for an inclusive experience.
2. **Is a shock-absorbing surface necessary?**
Yes, installation on a shock-absorbing surface of at least 31 sqm is recommended to ensure safety.
3. **How is the carousel installed?**
The platform must be fixed flush with the ground and installation must be carried out on a stable and safe surface.

Mini buying guide:

When it comes to play equipment for public or private parks, it is essential to choose products that not only comply with safety regulations but are also capable of promoting inclusivity and fun for all children. Here are some guidelines to ensure you make the right choice. **Safety** is the number one priority in a play area. Check that the space around the carousel is equipped with an **adequate shock-absorbing surface**, as **recommended (31 sqm)**. This not only **prevents injuries**, but ensures a safe area where children can play in peace. Ensure that the carousel is easily **accessible** for children with motor disabilities. This carousel is specifically designed to allow **entry for a wheelchair**, with **appropriate structures** including a **safety belt** for safe and comfortable use. When choosing outdoor equipment, it is essential that the materials are **weather-resistant**. In this case, the

materials used (**powder-coated steel and HDPE**) are durable, **corrosion-resistant** and easy to maintain over time, ensuring a long product life cycle. Think about how the carousel will fit into the overall context of the playground. Choose equipment that promotes interaction between children with and without disabilities, encouraging shared play and inclusion. Consider maintenance costs and times. A carousel built with **high-quality materials** requires less maintenance and offers a longer duration, thus reducing long-term costs. The **h575_154** model offers a **perfect mix of safety, comfort and ease of use**, making it an excellent option for those looking for a reliable and versatile game for children and children with reduced mobility. By following these tips, you can ensure that the investment in your play area is beneficial for everyone, guaranteeing not only safety but also an inclusive and stimulating environment for children of all abilities.
