Inclusive roundabout for playground h575_87

Inclusive roundabout with maximum number of 4 users. Age: 3-8 years. Dimensions: h 88 x Ø 225 cm.

Inclusive roundabout, to be placed in public parks and recreational areas. Its structure and benches are designed for the simultaneous use by able-bodied children and children in wheelchairs, for the **age group 3-8 years**. The maximum capacity is **4 seats**, thanks to **one seat** that accommodates 3 children and **one station for a wheelchair**. The platform, with a rotation system, is made of **non-slip sheet metal**, installed flush with the ground, and allows for **easy entry**. The **included safety belt** ensures secure anchoring of the wheelchair. The seats and the steering wheel are made of **high-density polyethylene (HDPE)**. The fastening elements, screws, nuts, and washers are made of **galvanized steel** and protected by **polyethylene rings and caps**. The tubes are made of curved and powder-coated **metal**.
