

## Inclusive roundabout h575\_60

Inclusive roundabout. Number of users 5.

**Roundabout** that promotes **interaction among all children**, educating them on the **value of inclusion** and the importance of being together. The particular design, in addition to facilitating access to the structure even for users with **reduced motor skills**, requires everyone's collaboration to make the most of the game's fun. The tube placed near the thumb-shaped element, in fact, acts as a support, allowing the older child to hold on while stomping on the ground and setting the roundabout in motion. The seat, made with an **HDPE panel** (th. 19 mm), is fixed on a **sheet metal platform**, whose dimples are intended to reduce the risk of slipping. To ensure additional support, the game includes a **painted galvanized steel handle**.

### Technical features:

- Material: HDPE
- Sheet metal platform
- Dimensions: Diameter 140xh.77 cm
- Safety area: Diameter 561 cm
- Max fall height:
- Recommended shock-absorbing surface: 24.7 sqm
- Max number of users: 5
