

Inclusive sandbox for children h763_12

Inclusive sandbox in wood and polyethylene for playgrounds, ages 1-12. Central basin with sliding closable tops, impact surface 33.87 m². EN 1176 certified.

The **inclusive sandbox** is a play structure designed for **playgrounds, play areas, kindergartens, and outdoor recreational spaces**. Designed to accommodate **all children between 1 and 12 years old**, it represents a play solution that promotes inclusion and accessibility in educational and recreational contexts. The central basin allows for play in the sand, while the **sliding upper surfaces** allow children to interact with moving elements, stimulating motor skills and coordination.

The structure combines **wood, autoclave-treated laminated wood, and polyethylene**, materials selected for durability and safety. The closable design allows for practical sand management and simplified maintenance.

Technical features

- Type: inclusive sandbox with central basin
- Age of use: from 1 to 12 years
- Sliding and closable upper surfaces
- Overall dimensions: L. 4.01 x D. 2 x h. 0.4 m
- Largest part dimensions: L. 3.36 x D. 0.66 x h. 0.12 m
- Free fall height: 0.4 m
- Impact surface: 33.87 m²
- Minimum space required: 7.16 x 5 m
- Materials: wood, autoclave-treated laminated wood, polyethylene
- Certification: EN 1176 (German Institute TÜV – SÜD)
