

Inclusive wooden path h575_70

Inclusive play composition. Dimensions: 623x692xh.224 cm. Age: 2-12 years.

Inclusive path that favors a learning approach in a fun way and within everyone's reach. A **colored HDPE bow** distinguishes the gables of the vault above the tunnel, which is made of **powder-coated steel tubes**, **to stimulate the child's skills**. The complex is characterized by the presence of an inclusive path and a **tower with slide**, connected to each other by a **Tibetan bridge**. The structure is made of **90x90 mm Nordic pine wood posts**, whose corners are rounded (r. 10 mm), and easily accessible platforms in **embossed sheet metal** to ensure high slip resistance. It is equipped with **handrails** for easy climbing in **powder-coated steel**, and wave-shaped HDPE decorative panels. **The playground** is equipped with a straight rotational polyethylene slide h 90 cm.
