

## Inclusive wooden waste bin with cat-shaped sides h763\_21

Waste bin for play areas in wood and steel with cat-shaped polyethylene sides. Dimensions 63x44.7x74 cm. Inclusive design. The **H763\_21** waste bin is an urban furniture solution specifically designed for integration into playgrounds, school courtyards, and play areas. The structure combines the robustness of **powder-coated steel** with the naturalness of **treated wood**, offering a functional element that transforms into a decorative component. The figurative cat-shaped side panels stimulate children's interaction, encouraging correct waste disposal and promoting civic education from childhood.

## Technical characteristics
