

## Indoor 3-container recycling set h719\_10

Three-compartment recycling station with lids. Capacity: 3 x 45 lt. Material: galvanized steel sheet.

The **3-compartment recycling bin with reduced depth** is the perfect choice for indoors, even in corridors and small areas. Made of **powder-coated galvanized steel sheet**, a **high-quality** material that makes the structure **solid** and **resistant to impacts and collisions**. The three compartments feature an **internal galvanized container** each, **tilting** for emptying the bags containing waste. In the front part there are **3 hinged doors** closed with a **square lock** (the square key is included). In the upper part of the structure, corresponding to each container, there is an **open colored lid** that allows for hygienic and quick waste disposal. The **two adjustable front feet** ensure stability on any surface. The recycling bin is **self-extinguishing** and, **in case of fire**, the **3 front doors close automatically**. **Wall mounting** is necessary, even if the structure is placed on the ground.

### Technical features:

- Dimensions: h 1000 x w 1210 x D 300 mm
- Material: high-quality powder-coated galvanized steel sheet
- Capacity: 3 x 45 lt
- Number of compartments: 3
- Open colored lids for sorting individual waste
- 3 internal galvanized steel containers tilting forward for bag emptying
- 3 hinged doors
- Key lock with key supplied as standard
- Adjustable front feet
- Structure color: light grey RAL 7035
- Color of peripheral elements for waste sorting: anthracite grey RAL 7016; sand yellow RAL 1002; powder blue RAL 5014
- DIN 4102, fire protection class A1
- Automatic lid closing in case of fire - Self-extinguishing, certified - -TÜV/GS
- Guaranteed solidity and resistance
- Warranty: 5 years

## INFORMATION

- Height in millimeters 1000.000000

- Capacity 3 x 45 lt
- Width in millimeters 1210.000000
- Material galvanized steel
- Depth in millimeters 300.000000
