

## Indoor multi-compartment recycling station h770\_16

3-compartment recycling bin with independent lids. Dimensions: W 62 x D 35 x H 72 cm.

The **multi-compartment recycling station h770\_16** is an elegant and functional solution for **waste sorting** in indoor environments, ideal for offices, schools and public spaces. Made of **1 mm thick sheet steel**, painted with **epoxy powders**, it is available in two color variants: **matte black** or **matte white**. This bin is designed to ensure **strength and durability** over time, while maintaining a modern and clean design that fits into any environment.

With a **total capacity of 150 liters** (50 liters for each of the three compartments), the recycling station facilitates waste separation, making daily management simple and efficient. The three compartments are separated by a painted **steel plate**, ensuring hygiene and order. Each compartment has its own **independent lid**, hinged to the frame via screws, which lifts to allow for the insertion or removal of the bag. The **3 steel bag holders**, also hinged, simplify the management of waste bags, making every operation practical and fast.

The **base** of the bin is equipped with a **foam** profile that protects the floor from scratches and marks, while ensuring stability. This product complies with the **Minimum Environmental Criteria (CAM)**, demonstrating a low environmental impact and focus on sustainability.

Don't miss the opportunity to improve waste management in your spaces with the **indoor multi-compartment recycling station h770\_16!** Thanks to its three separate compartments and independent lids, waste sorting will be simpler and more efficient. **Order now** and choose the color that best suits your environments! For large quantities, **request a customized quote**.

### Technical characteristics:

- **Material:** 1 mm thick sheet steel painted with epoxy powders
- **Available colors:** matte black, matte white
- **Total capacity:** 150 L (3 x 50 L)
- **Dimensions:** W 62 x D 35 x H 72 cm
- **Lids:** independent, hinged, with central slot for waste
- **Base:** with foam profile for floor protection
- **Bag holders:** in steel, hinged to the frame
- **Bags** not included

### User benefits:

- Modern and elegant design available in two colors
- Facilitates waste sorting with three separate compartments
- Floor protection thanks to the foam profile
- Simple to manage with independent lids and bag holders
- Complies with CAM environmental criteria, an ecological choice

### FAQ:

#### 1. Is it suitable for outdoor use?

No, the bin is designed exclusively for indoor environments.

2. **How is emptying managed?**

The independent lids lift easily thanks to the hinges, allowing quick access to the bags.

3. **Which bags can be used?**

Standard 50-liter bags are suitable for each compartment.

4. **Is the bin difficult to clean?**

No, it is easy to clean thanks to the painted steel surface.

**Mini buying guide:**

Choosing an indoor waste sorting bin requires attention to several aspects. First of all, consider the **capacity**: with 150 total liters, this model is ideal for spaces with high foot traffic. Evaluate the **number of compartments** needed for effective waste management: this 3-compartment bin offers great flexibility. Finally, the **quality of materials** is essential to ensure durability and ease of maintenance. The epoxy powder-coated steel ensures resistance and a long service life. With these elements in mind, our **h770\_16 bin** stands out for its **functional design**, quality materials, and environmental certifications, making it the perfect solution for optimizing waste management in indoor spaces.
