

Indoor recycling bin 2 x 48 lt h1025_30

Indoor steel recycling bin with 2 compartments and pictograms included. Dimensions: W 48 x D 33 x H 49 cm.

The **H1025_30 indoor recycling bin** is the compact and functional solution for the **proper management of waste in professional and public environments**, where space is limited but recycling is essential.

With a **total capacity of 48 liters**, divided into **two 24-liter compartments**, this station is composed of a **painted steel body and lid**, resistant to wear and easy to clean. Each compartment includes an **internal plastic container with handles**, which allows for **easy emptying from the top**.

The minimal and linear design (only 48 cm wide and 49 cm high) makes it perfect for **offices, waiting rooms, canteens, school or healthcare environments**, where order and sustainability go hand in hand.

Included in the supply is a **kit of adhesive pictograms**, to clearly identify the types of waste to be disposed of in each compartment. The bin is available in **different colors**, to customize the station according to the environment's needs.

Make waste recycling more efficient even in small spaces! Order the **H1025_30 container** and request a tailor-made supply for your environments.
