

## Indoor recycling bin 3 compartments h957\_60

3-compartment 95-liter recycling bin in DC01 steel. Includes galvanized internal containers, flap lid, and M1 fireproof certification.

The **indoor recycling bin h957\_60** is a high-capacity professional system (95 liters) designed for the management of three different types of waste. The structure is made of **cold-rolled steel sheet (Quality DC01)** with a black body and a removable RAL 9006 gray lid. Disposal is facilitated by **three openings with flap doors**, color-coded for correct material separation. Internal management is handled by **three removable galvanized sheet metal containers**, ensuring hygiene and corrosion resistance. Finished with fire-retardant electrostatic painting, this bin guarantees stability and fire safety, resting on a solid PVC base with a metal insert.

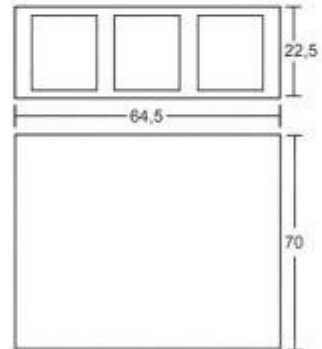

## Technical features

- **Dimensions:** 64.5 cm x 22.5 cm x 70 cm (Height)
- **Total capacity:** 95 liters
- **Net weight:** 18 kg
- **Body material:** White cold-rolled sheet (Quality DC01, EN 10130 standard)
- **Internal containers:** 3 cold-rolled galvanized sheet buckets (Quality DX51D, EN 10346 standard)
- **Opening system:** Removable top lid with flap doors
- **Base:** Black PVC with metal insert
- **Painting:** Fireproof polyester resin (thickness 60 microns) polymerized at 200°
- **Fire certifications:** Class A2-s1, d0 (UNE-EN 13501-1) and M1 (UNE 23727)
- **Colors:** Black body, RAL 9006 gray lid with colored edges
