

## Indoor recycling bin h424\_93

3-compartment recycling bin. Indoor use. Capacity: 120 lt.

**Indoor waste bin** specifically designed to ensure proper waste separation. Suitable for placement in public places such as offices, universities, stations, and shopping malls. It features a **very resistant steel structure** with a base to be bolted down and equipped with **adjustable plastic feet** that ensure excellent stability. The interior is divided into **3 independent compartments** to accommodate various types of waste and allow for easy emptying. The internal buckets are made of metal and equipped with an **elastic band for bag attachment**. The lid features **3 open insertion slots** and is provided with a **key lock**. Included in the supply are also colored labels for waste identification.
