

Indoor recycling bin h770_17

3-compartment recycling bin with security lock and top lid. Dimensions: W 62 x D 35 x H 72 cm.

The **3-compartment recycling bin h770_17** is designed for indoor environments, ideal for offices, schools, companies and public spaces. Made of **1 mm thick sheet steel** and painted with **matte white epoxy powders**, this bin offers resistance and durability, while maintaining an elegant aesthetic that fits any modern environment.

The top lid is equipped with **three separate holes** for the collection of different types of waste, and the **security lock with a triangular section key** ensures that the content is safe and that only authorized personnel can open it. The lid is **hinged** to the body and lifts easily to allow quick access to the content for emptying and maintenance. The three **steel bag holders**, completely removable, facilitate the insertion and removal of waste bags, keeping the bin always tidy and hygienic.

The three internal compartments are separated by a **steel plate**, allowing for a clear division of waste. The **base** is equipped with **foam pads** that protect the floor from scratches and ensure greater stability of the bin, avoiding accidental movements. With a **total capacity of 150 L** (50 L for each compartment), this bin is perfect for environments that require practical and effective management of separate waste collection. Furthermore, the product complies with the **Minimum Environmental Criteria (CAM)**, guaranteeing respect for ecological regulations.

Simplify waste management in your indoor space with the **3-compartment recycling bin h770_17**! Resistant, secure and easy to maintain, it is the ideal option for those looking for an efficient and modern solution. **Buy your bin now** or **request a personalized quote** for large quantities and discover how to improve hygiene and organization in your environment.

Technical features:

- **Material:** 1 mm thick sheet steel painted with epoxy powders

User benefits:

- Guaranteed security thanks to the security lock
- Easy to manage with removable bag holders
- Floor protection with foam pads
- Elegant aesthetics suitable for any modern environment
- Respects CAM ecological criteria, a sustainable choice

FAQ:

1. **How do you open the bin?**

The lid is equipped with a triangular section key lock to ensure that only authorized personnel can access it.

2. **Is it suitable for outdoor use?**

No, it is specifically designed for indoor use.

3. **What material is the bin made of?**

It is made of epoxy powder-coated sheet steel, corrosion-resistant and easy to clean.

4. **What capacity do the bags have?**

Each compartment can hold a 50 L bag, for a total capacity of 150 L.

Mini buying guide:

When buying an indoor recycling bin, first consider the **capacity** needed for your space. This model has a total capacity of **150 liters** distributed in three compartments, ideal for areas with high flows of people. Evaluate the presence of **security features**: the key lock is an advantage, especially for offices or public areas where greater control is required. Finally, the **material** is another key factor: epoxy powder-coated steel offers long life and resistance.
