

Indoor recycling bin h86_266

Anti-UV painted steel container, push/pull system, adjustable feet and floor fixing. Dimensions: W 38 x D 38.4 x H 76 cm.

The **indoor recycling bin h86_266** has been designed to manage metal collection in indoor environments in a practical and elegant way. Made of **anti-UV powder-coated steel**, this bin offers **strength and durability**, making it ideal for offices, schools, shopping centers and public spaces.

The **push/pull opening system**, equipped with a mechanical lock, ensures practical and hygienic use, while the **integrated bag support on guides** facilitates quick and uncomplicated bag changes (bags not included).

Thanks to the **4 adjustable feet**, the bin remains stable even on uneven floors. It can be fixed to the floor using **4 anchoring points**, offering greater safety in high-traffic environments. The clear signage on the door and the calibrated opening make it intuitive and ideal for specific use in metal collection.

The modern design and the matte nature green color make it a discreet and pleasant-looking element, perfect for integrating into various indoor environments.

Choose the **h86_266 bin** for practical and organized management of metal recycling. A resistant, functional product with a modern design for indoor environments!
