

Indoor recycling bin h86_268

Anti-UV powder-coated steel container, with push/pull system, adjustable feet, and bag support on guide. Ideal for packaging waste collection. Dimensions: W 38 x D 38.4 x H 76 cm.

The **indoor recycling bin h86_268** is a robust and elegant solution for managing **packaging** recycling in indoor environments. Designed to ensure **efficiency** and **durability**, it is made of **anti-UV powder-coated steel**, which makes it resistant to wear and external agents.

Thanks to the practical **push/pull opening system** with mechanical closure, the container is simple and safe to use. It is equipped with an **integrated bag support on a guide** (bags not included), which allows for quick bag changes. The **adjustable feet** allow for stable positioning even on uneven floors, while the possibility of **floor fixing** at 4 points ensures greater safety in high-traffic areas.

The container is equipped with **clear signage** on the door and a calibrated opening for packaging, making it easy and intuitive to use. The **modern design** and the **matte nature green** color make it an ideal complement for offices, schools, common areas, and public spaces, promoting sustainability and correct waste management.

Choose the **indoor recycling bin h86_268** for practical and elegant packaging collection. Designed to last, it is the ideal solution for improving waste management in a sustainable way!
