

Indoor recycling bin h86_269

Anti-UV steel container for other waste collection, with push/pull opening, adjustable feet and bag support. Dimensions: W 38 x D 38.4 x H 76 cm.

The **h86_269 indoor recycling bin** is a practical and modern solution for managing **general waste** in indoor environments. Made of **anti-UV powder-coated steel**, it guarantees excellent resistance to wear and corrosion, maintaining an elegant and professional appearance.

Equipped with a **push/pull opening system** with mechanical closure, the container ensures ease of use and hygiene. The **integrated bag support on guides** simplifies bag changes (bags not included), making it particularly convenient for daily use. Additionally, the **adjustable feet** allow for stable installation even on uneven floors.

The **signage on the door** and the calibrated opening for general waste make this container intuitive to use, ideal for offices, schools, canteens, and other common areas. The possibility of **floor fixing** at 4 points adds an additional level of security in high-traffic environments.

The **elegant design** and the **matte nature green** color make it a discreet yet functional element, perfect for improving space organization and promoting effective waste management.

Optimize general waste collection with the **h86_269 indoor recycling bin**: durable, practical, and with a modern design, it is the perfect choice for keeping indoor environments clean and tidy.
