

Indoor recycling bin h8654

Recycling bin for shopping centers and offices. Capacity 65 L. Dimensions (mm) 380x620x730h.

Modular indoor recycling container, perfect for shopping centers, offices, schools and museums. The entire body is made of manganese grey **steel** and features a **front door**, opening with a triangular key (included in the order). Also supplied are 4 adjustable plastic feet to position the product on uneven ground. The internal space accommodates a plastic bag holder for a **maximum capacity of 65 L**. The **stainless steel lid** is available in **various colors**. On the lid, a hole with a diameter (mm) of \varnothing 180 and with a push/pull system allows for the disposal of smaller waste without spillage. By purchasing several products of different colors, you can create a single ecological island. Waste identification labels are not included, but are available upon request subject to a quote. **Container dimensions** (mm) 380x620x730h.

***Waste identification labels not included; available upon request subject to a quote.**
