

Indoor recycling bin h957_45

30 L stainless steel recycling bin with pedal and lid. Dimensions: Ø 29 x H 63 cm.

The **H957_45 recycling bin** is a **professional and hygienic solution** designed for indoor environments such as **offices, canteens, company kitchens, schools and common areas**. Specifically designed for **organic waste** collection, it is equipped with **brown RAL 8014 adhesive labels** on both the lid and the front, for **clear identification of the type of waste**, according to the color standards of waste sorting.

Made of 0.4 mm thick **AISI 430 stainless steel**, the container guarantees **resistance to wear, impact and abrasion**, and has been **tested for fire stability** in compliance with current regulations. The **lid with pedal opening** ensures **contactless use**, reducing the risk of contamination in environments that require high cleaning standards.

Inside there is a **removable polyethylene bucket**, easy to remove and clean, while the **black hinges and finishes** complete the structure, uniting **functionality and minimalist aesthetics**.

With a **capacity of 30 liters**, a **diameter of 29 cm** and a height of **63 cm**, the H957_45 container represents a reliable and discreet choice for those looking for a **robust, certified and visually organized** product for organic waste management.

Choose the **H957_45 container** for efficient and compliant organic collection. Request a personalized offer for multiple supplies.
