## Indoor recycling station h770\_13

3-compartment waste bin in painted steel, with top lid. Dimensions: W 69 x D 25 x H 65 cm.

The **indoor recycling station h770\_13** is designed for the effective management of waste inside offices, schools, or public environments. Made of 1 mm thick **sheet steel**, it is painted with epoxy powders for greater **corrosion resistance** and a modern aesthetic in olive green (RAL 6013). Its **rounded anti-injury perimeter edges** guarantee safety in daily use, while the base is equipped with protective rubber pads for the floor.

The **removable lid** in **city grey (RAL 7043)** steel is equipped with three holes to facilitate the correct disposal of waste and offers easy access to the body for inserting and removing bags. The internal structure is divided into three independent sections, each with a **removable steel bag holder**, simplifying the management and replacement of **30 L** bags for a total of **90 L** of capacity.

Thanks to compliance with the **Minimum Environmental Criteria (CAM)**, this product ensures an eco-sustainable choice for waste sorting, ideal for those who want a practical and durable solution for indoor waste management.

Choose the **recycling station h770\_13**, for effective and safe management of indoor waste! Request a quote now for larger quantities.

### Technical features:
