

Indoor totem with Samsung 50-inch touch screen monitor h738_138

Indoor single-sided totem, self-standing, with Samsung 50" touch screen monitor, aluminum structure and tempered glass front. Dimensions: W. 789 x D. 500 x H. 2020 mm.

The **self-standing totem h738_138** is a technologically advanced and aesthetically refined solution for your visual communication. Equipped with a **50" Samsung touch screen monitor**, this totem is perfect for interactive presentations, info points, and multimedia content in professional environments such as showrooms, trade fairs, shopping centers, and offices.

The structure, made of **black powder-coated aluminum**, is completed by a **tempered glass front (ESG12150 certified)** to ensure optimal protection of the monitor against vandalism. Stability is ensured by a **heavy 10 mm steel base**, which can be anchored to the ground using fixing screws (not included).

Thanks to the possibility of uploading multimedia content via **LAN, USB, or wireless connection**, the totem allows for simple and fast information management. Furthermore, it is equipped with an **internal cooling fan, double security lock**, and a **slim design** that makes it ideal for modern and representative spaces.

For a personalized touch, it is possible to add your own logo (upon request for a quote). Delivered already assembled, this totem represents an excellent choice for those seeking an innovative, functional, and high-quality solution.

Purchase the **self-standing totem h738_138** now to enrich your visual communication with an interactive and elegant solution. For more information or to customize it with your logo, **request a quote** without obligation!

FAQ:

1. **Is the totem suitable for continuous use?**
Yes, the touch screen monitor is designed for 24/7 operation, ideal for professional and public environments.
2. **In what contexts can it be used?**
It is perfect for trade fairs, points of sale, shopping centers, showrooms, and any environment that requires interactive visual communication.
3. **What connections does the monitor support?**
The monitor allows content to be uploaded via LAN, USB ports, or wireless connection.
4. **Is the base stable even without anchoring?**
Yes, the heavy base ensures excellent stability, but for greater security, it can be anchored to the ground using fixing screws (not included in the supply).
5. **Can I customize the totem with my logo?**
Yes, it is possible to request customization with your logo upon request for a quote.

Mini buying guide:

The **single-sided self-standing indoor totem for 50" monitors** represents the ideal solution for those looking for an elegant and functional multimedia system. Thanks to the included **Samsung touch screen monitor**, it allows you to offer interactive presentations and high-impact visual information content. The sturdy **powder-coated aluminum** structure and **tempered glass** front ensure security and durability over time, making it perfect for professional environments such as showrooms, events, trade fairs, and points of sale.

The possibility of uploading multimedia content via **LAN, USB, or WIRELESS** offers great versatility of use, while the heavy base that can be anchored to the ground guarantees stability even in high-traffic contexts. The structure is **already assembled**, simplifying setup. Furthermore, it is possible to **customize** the totem with your own **logo**, upon quote, to strengthen your corporate image and further attract the audience's attention.

Choose this totem to combine **modern design, advanced technology, and practicality of use** in a single solution.
