

Indoor waste collection bin h770_15

Pentagonal waste collection bin with hinged lid. Dimensions: W 35 x D 35 x H 70 cm.

The **h770_15 pentagonal recycling bin** is a practical and elegant solution for waste management in **indoor environments**. Made of **1 mm thick steel sheet** and painted with **black epoxy powders**, this bin is designed to last over time, resisting impacts and corrosion. Its pentagonal design makes it particularly versatile and suitable for modern spaces such as offices, schools, and commercial environments.

The **upper lid** is equipped with a central hole for waste disposal, facilitating daily use. Hinged to the body by screws, the lid lifts easily to allow quick access to the bag. The **steel bag holder**, also hinged, facilitates the insertion and removal of the waste bag, making maintenance simple and fast.

The **accident-prevention rounded edges** ensure safety in high-traffic environments, while the base with **foam pads** protects the floor from scratches and marks. With a **capacity of 70 liters**, this bin is perfect for daily use in environments that require order and cleanliness. Furthermore, the product complies with the **Minimum Environmental Criteria (CAM)**, demonstrating its reduced impact on the environment.

Improve waste management in your office or public space with our **h770_15 pentagonal recycling bin**! Robust, elegant, and easy to maintain, this bin is ideal for those looking for a practical and long-lasting solution. **Buy now** or **request a quote** for large quantities and discover how to optimize your space with style and functionality!

Technical features:

FAQ:

1. **Is the bin suitable for outdoor use?**

No, it is specifically designed for indoor environments.

2. **How do you empty the bin?**

The lid lifts easily thanks to the hinges, allowing quick access to the bag.

3. **What kind of bags can I use?**

You can use standard waste bags with a capacity of approximately 70 liters.

4. **Is the bin easy to clean?**

Yes, the bin is made of painted steel, easy to clean and resistant to external agents.

Mini buying guide:

To choose a recycling bin for indoor environments, first consider the **capacity** of waste you intend to manage daily. This **70-liter** model is perfect for offices and public areas with a constant flow of people. Also evaluate the **quality of materials**: epoxy powder-coated steel ensures strength and longevity. Finally, make sure the bin is **easy to maintain**, with quick access to the bag and removable components like the bag holder. With these elements in mind, our **h770_15 bin** stands out for its **functional design**, quality materials, and environmental certifications, making it the perfect solution for optimizing waste management in indoor spaces.
