

Indoor waste recycling bin 95L soft-closing lid h424_130

95-liter waste recycling bin with soft-closing lid, front door, and internal bag holder ring. Dimensions: W. 420 x D. 295 x H. 882 mm.

The **h424_130 recycling bin** offers a practical and elegant solution for waste management in indoor environments. Made of **galvanized steel** with a **thermosetting powder coating**, it guarantees resistance and durability over time. Its **95-liter** capacity makes it ideal for offices, schools, hospitals, and other indoor spaces.

Equipped with a **soft-closing lid**, it allows for quiet and hygienic use. The **front door with magnetic closure** ensures quick access for emptying, while the **internal galvanized steel bag holder ring** facilitates bag attachment. The **modular** design allows for single installation or the creation of **recycling stations** composed of multiple connected containers.

Thanks to the **integrated base with adjustable feet**, the container can be stably positioned on any surface. It is designed for **floor placement**, without the need for additional supports. Waste identification stickers are not included, available upon request and subject to a quote. Bags are not included in the supply.

Choose the **h424_130 recycling bin** for a professional and modular solution suitable for your indoor environments. **Contact us today for a personalized quote!**

Technical features:

- **Dimensions:** W. 420 x D. 295 x H. 882 mm
- **Capacity:** 95 L
- **Material:** galvanized steel with thermosetting polyester resin powder coating
- **Collection system:** internal galvanized steel bag holder ring
- **Lid:** with soft-closing
- **Internal access:** front door with magnetic closure
- **Base:** integrated with adjustable feet
- **Installation:** floor-standing
- **Usage:** indoor environments
- **Bags not included in the supply**

- **Stickers not included in the supply**, purchasable separately upon request for a quote

User benefits:

- **Silent use:** the soft-closing lid reduces noise during use.
- **Versatility:** can be installed individually or as part of a modular recycling station.
- **Practical access:** the front door facilitates emptying and maintenance operations.
- **Secure positioning:** adjustable feet for stable anchoring on any surface.
- **Robust design:** high-quality materials guarantee resistance and durability.

FAQ:

1. **What is the capacity of the bin?**

The capacity is 95 liters, ideal for waste recycling in indoor environments.

2. **Is the lid easy to use?**

Yes, it is equipped with a soft-closing mechanism that allows for quiet and effortless use.

3. **How is the stability of the container guaranteed?**

Thanks to the adjustable feet, the container remains stable even on uneven surfaces.

4. **Is the bin suitable for intensive use?**

Certainly, the robust galvanized steel structure makes it perfect for environments with a high flow of users.

5. **What are the main features of the base?**

The base is equipped with adjustable feet, which allow for stable positioning even on uneven surfaces.

Mini buying guide:

The **h424_130 recycling bin** is designed for those looking for a **robust and versatile** container for indoor waste recycling. Thanks to the **modular design**, you can install it individually or create complete recycling stations for efficient waste management. The **soft-closing lid** guarantees silent use, while the **galvanized steel** ensures long-term durability. Don't forget to check your needs in terms of capacity and design for perfect integration into your spaces.
